Learn. Advance. Heal.

How Do Subscribers **Access** CardioSource Plus?

- Access is granted by **IP address**.

- Institution provides ACC with **their IP range**.

- When someone visits www.ACC.org from within that IP range, the **banner at the top of the screen says "CardioSource Plus for Institutions"**

- Users must then **login using their existing ACC.org username/password**, or register on the site if they don't have an existing login for the site.

- Logging in will ensure that any CME and MOC credits they claim will be associated with them.

Learn. Advance. Heal.

Can My Fellows/Faculty Access CardioSource Plus **from Home**?

- Yes! They just need to be on your VPN.

- If your organization does not have a VPN, there is an alternative access model:

    Referring URL Authentication is the alternative access model.

- To set this up, your institution's IT department will need to set up a protected page (meaning users will need to log in with a unique username and password supplied by the institution to get to access the page) which contains a link to www.ACC.org/cardiosourceplus.

- The institution's IT department supplies ACC with the link to this protected page, and then www.ACC.org will recognize all click-throughs from it as a part of their **CardioSource *Plus*** account. **Important Note: The referring page must be http rather than https for this to work.

Helping Cardiovascular Professionals Learn. Advance. Heal.

How Do My Fellows/Faculty **Know What's Included** in CardioSource Plus?

There is an abundance of content on www.ACC.org and it can be hard to find things. Just go to **www.ACC.org/CardioSourcePlus** to easily see and know what's available through CS Plus.
